

QUALITY WATER CARE

Integrated features ensure the cleanest, clearest water with minimal effort from you.

- 1 Fill hot tub through primary filtration side to just above the highest jet.
- 2 Test your water for pH and total alkalinity using the Aqua Check test strips provided. Adjust your water accordingly. When balancing, always adjust alkalinity before pH.
 - *Make sure pump 1 is running in high speed when adding chemicals***
 - pH 7.2 - 7.8 Alkalinity 100 - 140ppm**
 - Raise alkalinity if required using Jacuzzi® Alka Up
 - 1 cap of Jacuzzi® Alka Up will raise alkalinity 10ppm
 - Lower alkalinity if required using Jacuzzi® pH Down
 - 1 cap of Jacuzzi® pH Down will lower alkalinity 10ppm (For example, if alkalinity is 180ppm you will need to add 4 caps of Jacuzzi® pH Down to 140ppm)

Add no more than 3 caps of Jacuzzi® pH Down or Jacuzzi® Alka Up in a 20 minute period

 - Adjust pH only if necessary
 - 1 cap of Jacuzzi® pH Down will lower the pH one colour shade on the test strip bottle.
- 3 Install Jacuzzi® ProClear® Mineral Cartridge as directed. Tie Zorbie to filter grate or place inside ProCatch™ bag if equipped.
- 4
 - Add 6 tablespoons of Stain & Scale
 - Add 1 tablespoon of Chlorine Granules
 - Add 6 caps of Ultra Spa
- 5 Run pump 1 on high speed for 20 minutes with hot tub cover open and retest; be sure to monitor your hot tub for safety while cover is open.
- 6 Once temperature reaches 90F add entire bottle of Spa Solution and run pump 1 on high speed for 20 minutes with the cover open.
